### Cosmetic Direction of The Patient After Cure of Cosmetic Dermatitis

Ritsuko HAYAKAWA\*

It is necessary for the patient with dermatitis to direct how to make her toilet after treatment of the dermatitis, be it due to cosmetics or not.

The procedure of the guidance is the following:

1. Discovery of causative products or agents.

In this process, dermatologist's efforts for discovering the products (agents) is needed.

2. Elimination of the causative products or affecting agents.
3. Preparation of the cosmetics without causative agents.

The maker's cooperative work is necessary.

4. Use test of the cosmetics without affecting agents or of which patch test reaction were negative.

In addition to this procedure, it is important for succeeding the guidance to select the cosmetics matching with the patient's age, occupation, taste and sense as well as with the patient's skin character.
